

Build Robots, Build Bonds: A Family Program Where Everyone Grows

A Free Family Program this Fall!

EXCITING ROBOTICS CLASSES FOR CHILDREN

(Ages 5–9)

<https://tinyurl.com/ae2ph639>

Children will explore coding robots, programming them to dance, draw, and navigate mazes. Children will create and learn about building their own shapes.

OPEN CONVERSATIONS AND SUPPORT FOR TODAY'S PARENTS

We will explore practical strategies for parents and caregivers for nourishing family relationships and building an affirming environment that fosters their children's growth at home. Experience more joy while parenting!

Classes for children and adults will run concurrently. Families will come together at the end of each session for children to teach their parents about robotics!

* This is a program for both kids and adults. Parent participation is required.

** Please, no children in the parenting classes with the exception of babies up to 6 months old.

Sponsored by Council Member Gale A. Brewer.

Free of charge – registration required.

Attend any or all of the following sessions:

WHEN: Sundays, 4:30 – 6:00 pm

- Sunday, November 23rd
- Sunday, December 7th

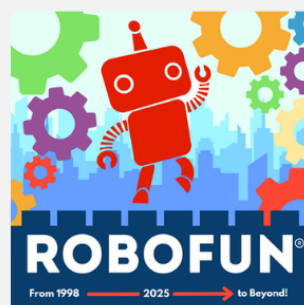

WHERE: Robofun

110 West End Ave
New York, NY 10023
(212) 245-0444
