

JOIN A FUN AND ENGAGING FAMILY EXPERIENCE!

A five-session program this fall.

EXCITING ROBOTICS CLASSES FOR KIDS (ages 5–9) ...

Children will learn about robotics by making robots and learning to code them.

...AND, INSPIRING PARENTING CLASSES FOR THE ADULTS!

One or two parents/guardians from each family will improve their parenting skills to build a positive environment at home and provide safe, stable, and nourishing relationships for their children's healthy development.

The classes for the children and the classes for the adults, will run concurrently, with the children and adults coming together at the end of each session for inter-generational sharing.

* This is a program for both kids and adults. Parent participation is required.

** Please, no children in the parenting classes with the exception of babies up to 6 months old.

Sponsored by Council Member Gale A. Brewer.

Free of charge – registration necessary.

Attend any or all of the following sessions:

WHEN: 4 Sundays, 4:30 – 6:00 pm
